

FATIMA AHMADI

EPI CERTIFIED VACCINATOR

Kabul, Afghanistan | +93 70 123 4567 | fatima.ahmadi@email.com

PROFESSIONAL SUMMARY

- Dedicated EPI Certified Vaccinator with 5+ years of hands-on experience in Afghanistan's Expanded Program on Immunization (EPI) and polio eradication campaigns. Skilled in vaccine administration, cold chain management, and community health education. Proven track record of achieving 95%+ vaccination coverage in assigned catchment areas and conducting effective defaulter tracking. Adept at working in resource-limited and challenging environments, including remote and underserved communities. Committed to safeguarding children from vaccine-preventable diseases through compassionate care and evidence-based public health practices.

CLINICAL EXPERIENCE

EPI Certified Vaccinator

UNICEF Partner Organization | Kabul Province, Afghanistan

January 2021 – Present

- Administer oral and injectable vaccines to 100+ children daily during national immunization campaigns and routine EPI sessions.
- Maintain 95%+ vaccination coverage in assigned catchment area through effective planning and community mobilization.
- Track and follow up 200+ defaulters monthly, achieving an 85% return-to-vaccination rate through home visits and community engagement.
- Conduct 50+ community health education sessions annually on immunization importance, vaccine safety, and disease prevention.
- Manage cold chain equipment ensuring vaccine potency and safety; monitor refrigerator temperatures and maintain accurate stock records.
- Collaborate with community health workers, local elders, and religious leaders to build trust and increase vaccine acceptance.

Polio Vaccination Campaign Volunteer

WHO Polio Eradication Initiative | Kabul & Nangarhar Provinces, Afghanistan

March 2019 – December 2020

- Participated in 12 national polio immunization days (NIDs) and sub-national immunization campaigns across multiple provinces.
- Administered oral polio vaccine (OPV) to 500+ children per campaign day during house-to-house vaccination drives.
- Identified and reached zero-dose children in high-risk areas, contributing to a 30% increase in campaign coverage.
- Accurately recorded immunization data and reported daily coverage statistics to campaign supervisors and district health offices.

- Engaged with families to address vaccine hesitancy, resulting in improved community participation in polio campaigns.

Community Health Worker — Immunization Focus

Ministry of Public Health (MoPH) | Kabul Province, Afghanistan

June 2017 – February 2019

- Provided primary healthcare services and immunization support at a rural Basic Health Center serving 5,000+ population.
- Assisted in routine EPI sessions; prepared vaccines, maintained sterile injection practices, and updated immunization registers.
- Conducted growth monitoring and nutrition screening for children under 5 years as part of integrated health services.
- Trained 15 mothers on proper infant care, breastfeeding, and the national immunization schedule.

EDUCATION

Community Health Worker (CHW) Training Program

Ministry of Public Health Training Center | Kabul, Afghanistan

Graduated: May 2017

- Completed comprehensive 18-month CHW training program covering primary healthcare, maternal and child health, immunization protocols, and community mobilization.

High School Diploma

Kabul Girls' High School | Kabul, Afghanistan

Graduated: 2015
